

AMUL THANTHARATE

Junior Cloud Engineer

Pune, Maharashtra, India | +91-9518315192 | amulthantharate@gmail.com | linkedin.com/in/amulthantharate | github.com/amulthantharate

PROFESSIONAL SUMMARY

Junior Cloud Engineer with 2 years 4 months of hands-on experience supporting AWS and Azure infrastructure using **Terraform, Kubernetes, and CI/CD pipelines**. Experienced in GitOps delivery with **ArgoCD and Helm**, container orchestration with **Docker and EKS/AKS**, and applying security best practices through **IAM least-privilege and DevSecOps** principles. Skilled in monitoring and observability using **CloudWatch, Prometheus, and Grafana**, and contributed to cloud cost optimization efforts of **20-30%**. **AWS Certified Solutions Architect - Associate**; actively pursuing AWS DevOps Engineer Professional and CKA certifications.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, VPC, IAM, S3, RDS, Lambda, CloudWatch, ELB/ALB, CloudFront, CloudTrail, Auto Scaling), Azure (VMs, VNet, NSG, Blob Storage, Azure AD)

DevOps & IaC: Terraform, CloudFormation, Kubernetes (EKS/AKS), Helm, ArgoCD (GitOps), Docker, Podman, GitHub Actions, Jenkins, GitLab CI

Security & Observability: IAM Least Privilege, RBAC, CloudTrail, SonarQube, Trivy, Prometheus, Grafana, CloudWatch, SNS

Languages & Tools: Python, Go, Bash, YAML, Linux, Git, Networking (VPC, Subnets, NAT, NACLs)

Certifications: AWS Certified Solutions Architect - Associate (SAA-C03), AWS Cloud Quest: Security, AWS Knowledge: Architecting

PROFESSIONAL EXPERIENCE

Junior Cloud Engineer — Veritas Communications Private Limited

Feb 2024 – Jun 2026 | Hyderabad

- Assisted in designing and deploying AWS and Azure cloud infrastructure, including VPC/VNet architecture, IAM/RBAC configuration, and Terraform-based Infrastructure as Code.
- Supported CI/CD pipeline development using GitHub Actions, Jenkins, and ArgoCD; helped implement Helm-based Kubernetes (EKS/AKS) deployments with rollback and drift detection.
- Supported deployment and management of containerized applications using Docker and Kubernetes across development and QA environments.
- Provisioned AWS and Azure infrastructure (EC2, S3, IAM, VPC, VMs, VNet) using Terraform for consistent, repeatable environment setup; monitored system health with CloudWatch, Prometheus, and Grafana.
- Assisted in auditing cloud environments and applying right-sizing and resource tagging strategies, contributing to **20-30% cloud cost reduction**.
- Applied IAM least-privilege policies and container image scanning with Trivy as part of DevSecOps best practices; currently pursuing AWS DevOps Engineer Professional (DOP-C02) and CKA certifications.

KEY PROJECTS

AWS Cloud Security CTF Collection | Golang, Terraform, AWS, Docker

- Built a Golang CLI to provision and destroy intentionally vulnerable AWS infrastructure for red/blue team security training, automating the full environment lifecycle with Terraform for repeatable security labs.

EKS GitOps Pipeline (ArgoCD + Helm) | Kubernetes, EKS, ArgoCD, Terraform, Helm

- Deployed a production-grade Amazon EKS cluster using Terraform and Helm; configured ArgoCD for automated GitOps continuous delivery with drift detection and rollback, enforcing separation of application and infrastructure repositories.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science & Engineering

Graduated 2023

Sardar Patel University, Balaghat | CGPA: 7.5
